

Antivirus Software Requirements

If you're antivirus has expired, you will have 24 hours from the time you uninstall the antivirus program to install a working antivirus...

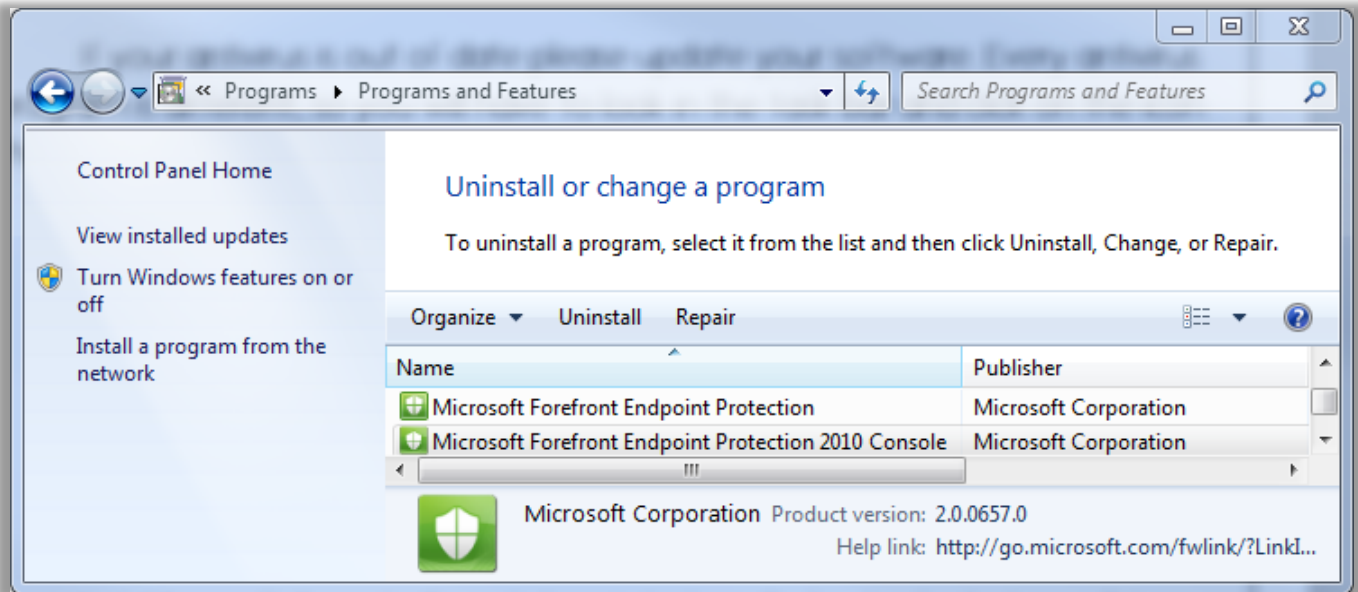

1. You will receive a warning first.

2. Then you will be quarantined if you do not comply within 24 hours of the warning.

3. If your antivirus is expired, please replace the software. Every antivirus program is different, so you will have to explore **-Programs and Features-** and select the icon that represents your antivirus software.

- a. Information Technology recommends using Microsoft Security Essentials, which can be downloaded from - <https://www.microsoft.com/en-us/download/details.aspx?id=5201> -
 - i. It is designed for Windows 7 systems.
- b. Windows Defender is available and built into the Operating System for all systems that are Windows 8 or newer.
 - i. You may have to uninstall an additional antivirus program that your system came with, and then complete a restart of your system before Windows Defender will assume control.

4. Allow Microsoft Security Essentials or Windows Defender to complete updates.

- a. Your system will notify you that the antivirus software is updated.
- b. Restart your computer. You should now be able to access the SWU Network.
