

## Why am I Required to Download SafeConnect?

*Each wireless computer (both Windows and Mac) must install the software SafeConnect, by Impulse Point in order to use SWU's wireless network. This software ensures that each computer meets certain minimum requirements before being allowed to connect to the wireless network...*

## Requirements for SWU's Wireless

1. Functioning and up-to-date antivirus software
2. Peer to Peer software be disabled or uninstalled.
3. Windows update is enabled, to keep the system current with security patches

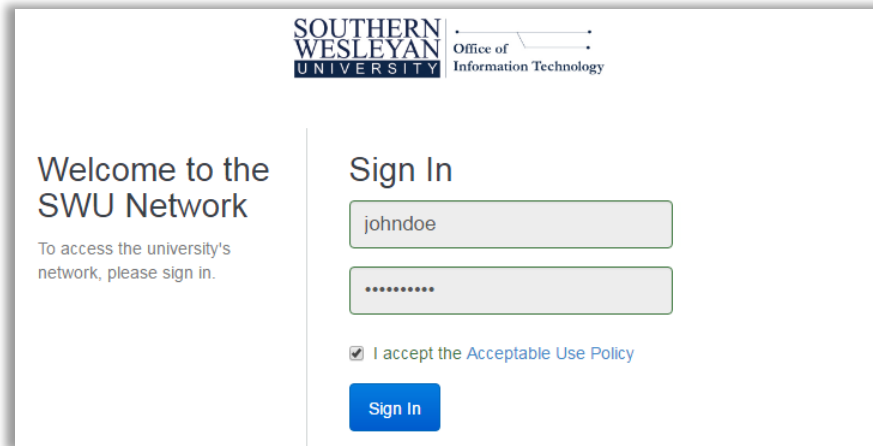

Each person will also be required to supply a username and password when connecting to the wireless network. This ensures that only authorized individuals, who are associated with SWU, will be using the wireless network.

These requirements ensure the wireless network is secure, robust, and stable while promoting an exceptional learning environment for all faculty, staff, and students at Southern Wesleyan University.

If you are not the owner of the laptop, you must get the approval of the owner before installing SafeConnect. You must have administrative rights to install SafeConnect.

## Connecting to the SWU Wireless

1. Connect to the SSID -SWU-.
  - a. The first time you connect, you will be directed to download and install SafeConnect, by Impulse Point. Refer to [Logging into SWU Network](#).
2. After the install process is completed, you will be directed to a page asking for a username and password. You will use the same name and password you would use to sign onto a SWU computer.

The screenshot shows the login interface for the Southern Wesleyan University network. At the top, the university logo and the Office of Information Technology are displayed. The page is divided into two main sections: a welcome message and a sign-in form. The welcome message reads 'Welcome to the SWU Network' and 'To access the university's network, please sign in.' The sign-in form includes a username field with 'johndoe', a password field with masked characters, a checkbox for 'I accept the Acceptable Use Policy', and a blue 'Sign In' button.

3. After successfully logging in, your browser will be directed to [www.swu.edu](http://www.swu.edu). From there, you can browse the Internet.
4. If you have problems connecting to the wireless network, please contact the Information Technology department's help desk at 864-644-5050.
  - a. Refer to [Logging into SWU Network](#) if you have already downloaded SafeConnect before.
  - b. Refer to [Antivirus Software Requirements](#) if you are receiving proxy warnings on your browser about needing an up-to-date antivirus software.
